

miMove

We want all our pupils to develop a positive relationship with physical and enrichment activities

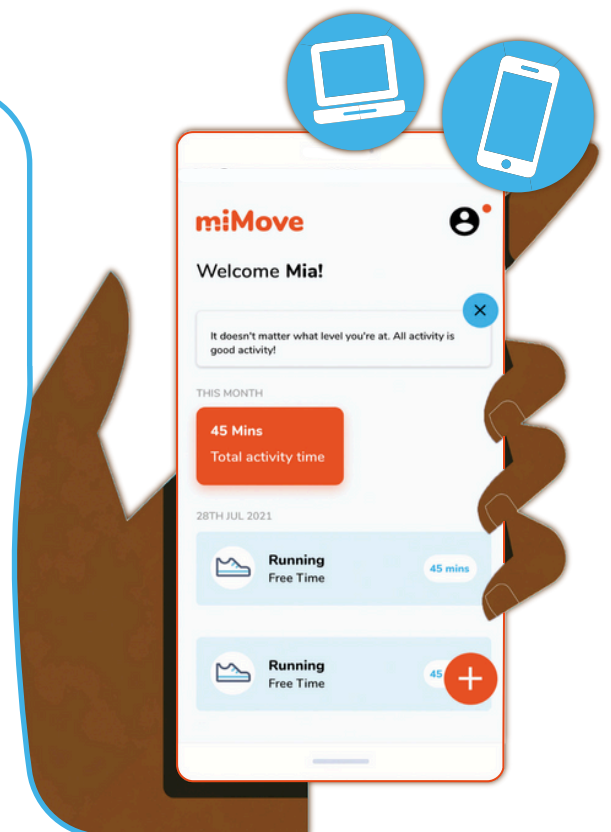

To help with this, we use miMove

miMove is a ground-breaking platform that helps us **support your child** to enjoy a range of activities beyond the classroom.

Pupils access their miMove account online OR via the mobile app. They record all the activities they do in and out of school and how they make them feel.

We can see this information and we use it to better support your child as well as **review the effectiveness of our work**.

It allows us to **celebrate individual progress** and identify where help might be needed. We do not use this information to compare students. We are interested in helping your child **engage with physical and enrichment activities** to support their health and wellbeing.

Is miMove safe?

Your child's data will remain secure and be treated sensitively.

Only your child, you and authorised staff at school will have access to each individual's data. miMove is fully GDPR compliant. You can read the privacy policy and find out more at mimoveapp.com
